

Ankitkumar Arvindbhai Gohil

.NET Developer | ASP.NET Core Developer | Software Developer

PROFILE

Results-driven .NET Developer with 5+ years of experience in designing, developing, and maintaining web applications using ASP.NET Core, .NET, Web API, Entity Framework Core, and SQL Server. Experienced in building scalable RESTful APIs, database design, CRUD operations, authentication, and performance optimization. Skilled in HTML, CSS, JavaScript, jQuery, and Bootstrap. Familiar with PostgreSQL, Dapper, .NET MAUI, IIS deployment, and modern development practices.

WORK EXPERIENCE / PROJECTS

GIDM HRMS — .NET Developer

Developed an HRMS for employee attendance, leave management, salary slips, and employee records through an online portal. Implemented online Present/Absent attendance tracking and automated HR-related workflows to simplify employee and administrative operations.

E-Payment & DG Set Billing System

Developed an online billing and e-payment system for DG Set meter readings, unit consumption, bill generation and excess-unit charges. Implemented role-based workflows for Admin, Department, User and Consumer with online payment and Cyber Treasury integration. Technology: C#, ASP.NET Web Forms, .NET Framework 4.5, SQL Server, ADO.NET, JavaScript, AJAX, RDLC, IIS.

B2B DSC Vendor Registration Portal

Developed a B2B portal for Digital Signature Certificate (DSC) vendor registration, onboarding and service management. Technology: C#, ASP.NET Core MVC, .NET 6, Dapper, SQL Server, Razor, JavaScript, jQuery, AJAX, Bootstrap, IIS.

Mining Application Management System

Developed a digital mining application workflow for online applications, site registration, document processing and multi-level approvals. Technology: C#, ASP.NET Core MVC, .NET 6, Dapper, SQL Server, Razor, JavaScript, jQuery, AJAX, Bootstrap, IIS.

Insight Project & Task Management System

Developed a Jira-like platform for managing projects, tasks, bugs, assignments, priorities and development workflows. Technology: C#, ASP.NET Core MVC, .NET 6, Dapper, SQL Server, Razor, JavaScript, jQuery, AJAX, Bootstrap, REST APIs, IIS.

Ayushman Card Incentive Management System

Developed a government workflow system for Ayushman Card beneficiary entries, verification and incentive processing. Data is submitted by Urban Health Centres/Government Hospitals, verified through Taluka → District → State/Admin approval levels, and eligible payment lists are generated and uploaded for government disbursement. Technology: C#, ASP.NET Core MVC, .NET 8, Dapper, PostgreSQL, Npgsql, AutoMapper, RabbitMQ, ClosedXML, IdentityServer, Serilog, PWA.

Skills

Programming: C#, JavaScript, HTML5, CSS3

.NET: ASP.NET Core MVC, .NET 6, .NET 8, ASP.NET Web Forms, Web API

Data: Entity Framework Core, Dapper, LINQ, ADO.NET, SQL Server, PostgreSQL, SQLite, Npgsql

Frontend: Bootstrap, jQuery, AJAX, Razor Views, Responsive Design

Integration/Security: REST APIs, Web Services, ASMX, RabbitMQ, ASP.NET Identity, JWT, Role-Based Authorization, Anti-Forgery, CORS, Session Management

Reporting/Tools: RDLC, ReportViewer, ClosedXML, OpenXML, Excel Import/Export, Serilog, Middleware, Dependency Injection, Visual Studio, VS Code, Git, GitHub, IIS

Other: .NET MAUI, Windows Applications, SDLC, Performance Optimization, Problem Solving, Debugging, Production Deployment
